

Programme

Tuesday, June 12, 2015.	
8.40 - 9.00	Opening Remarks
8.50 - 9.25	Stefano Allesina, IT: <i>Network spandrels reflect ecological assembly</i>
9.25 - 9.45	C. Payrat-Borrs, CT: <i>The emergence of nestedness in mutualistic networks</i>
9.45 - 10.05	A.M. Martin Gonzalez, CT: <i>Preferential-attachment and sampling limitations in mutualistic networks: spandrel generators?</i>
10.05 - 10.25	Gianalberto Losapio, CT: <i>Plant facilitation drives the assembly of pollination networks</i>
10.25 - 10.45	D. Garca-Callejas, CT: <i>Species persistence in networks with multiple interaction types</i>
10.45 - 11.05	Coffee Break
11.05 - 11.40	Elisa Thebault, IT: <i>TBA</i>
11.40 - 11.55	Mateusz Iskrzyski, CT: <i>Ecosystem vulnerability to species loss: a broad study of real-world food webs</i>
11.45 - 12.10	Matthieu Barbier, CT: <i>Dimensionality reduction of complex food web dynamics</i>
12.10 - 12.25	Laura Hernandez, CT: <i>The joint influence of competition and mutualism on the stability of biodiversity in mutualistic ecosystems</i>
12.25 - 12.32	Amir Bashan, II: <i>The universal ecology of the human microbiome</i>
12.32 - 12.40	Maria Felipe-Lucia, II: <i>How does land use intensification change correlation networks between biodiversity, ecosystem functions and ecosystem services?</i>
12.40 - 13.10	Neo Martinez, IT: <i>Sloppy parameter sensitivities simplify prediction of ecological network dynamics</i>

IT: Invited talk, CT: Contributed talk, II: Ignite talk
